just for 

When it comes to your kids, only the best is good enough. Which is why we take such great care with our Just For kids products. At the design stage we benefit from our extensive experience as a developer of top sporting equipment. We only use materials that meet the highest quality standards and are ideal for use by young children. What's more, the quality of both raw materials and final products is stringently monitored. Together with our eye for detail and a craftsman's finish, this results in a unique product range.

The kids themselves just love our equipment, though this is for a host of other reasons! Such as the playful colour schemes and the opportunity to clamber, jump, hang and balance to their heart's content. Just For kids excels in designing products that challenge kids to get exercising over and over again.

But we have also thought about the teachers and supervisors of sports clubs, day-care centres, playgroups and primary schools. And we always focus on practicality and ease-of-use when developing our equipment. Just For kids equipment is space-saving and can be quickly set up and cleared away again. The equipment can be used in a multiplicity of ways and can be combined into ever new combinations. In addition to containing our entire product range, this catalogue gives you a few inspiring examples of these endless possibilities.

Interested? Then please don't hesitate to contact us for more information!

JUMPER

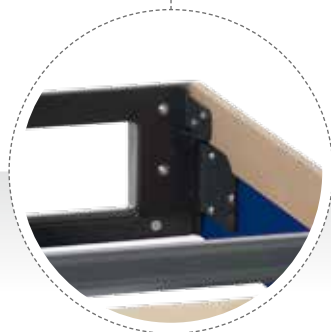

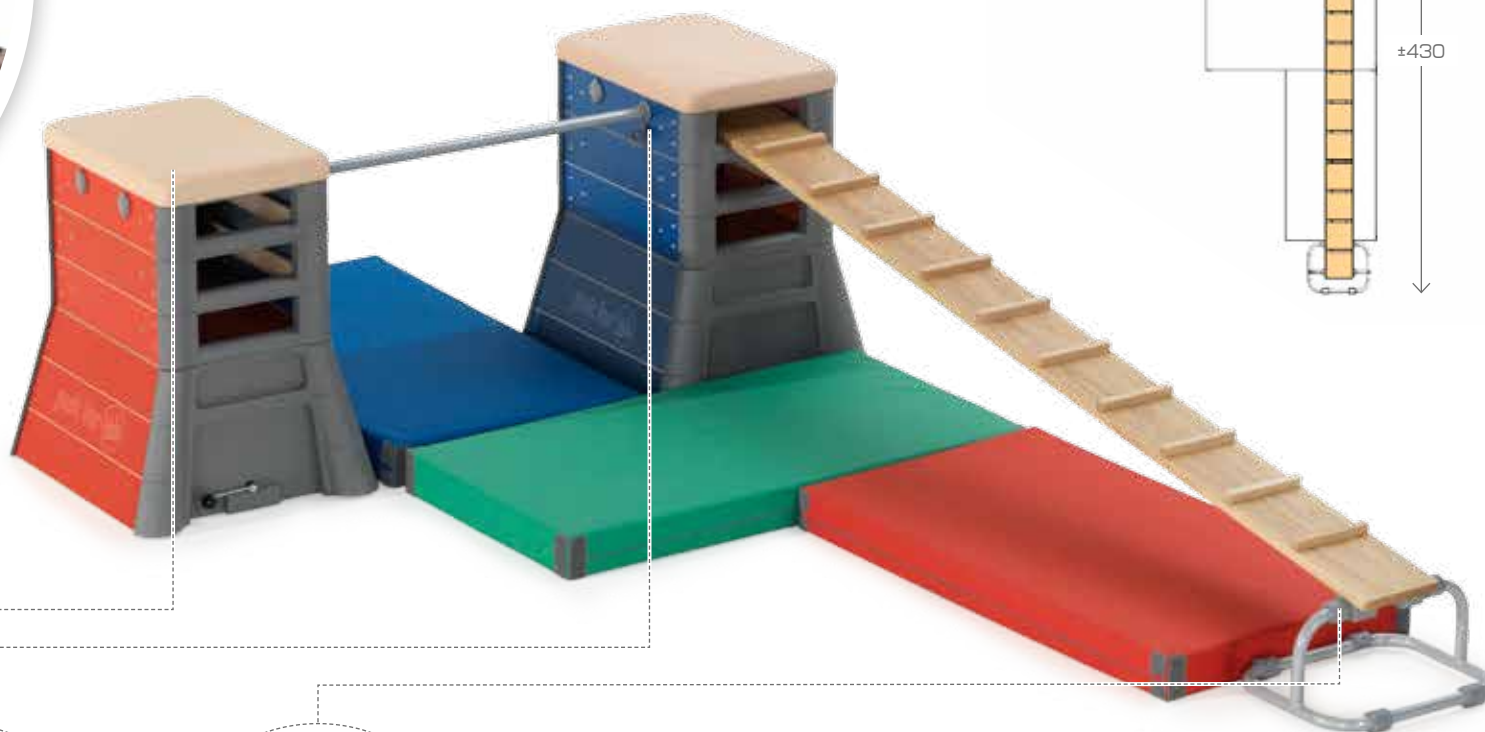

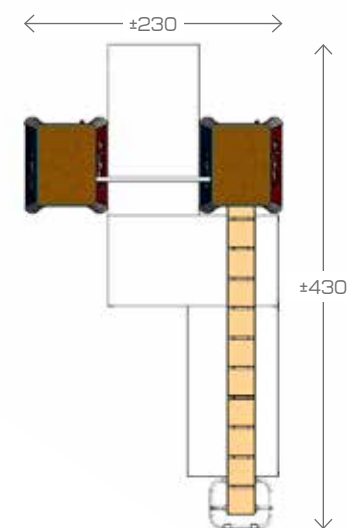

Item 1408254

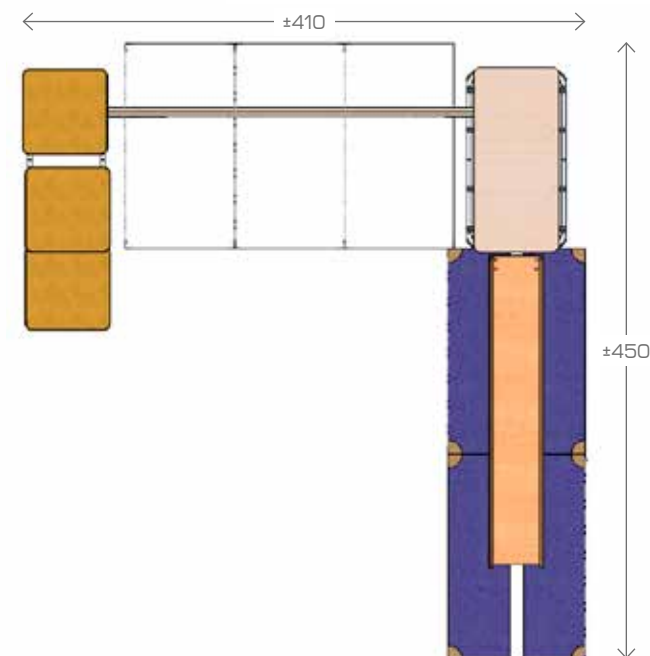

Designed as a vault for children, Jumper boxes have many possible functions: Connecting bars can be attached using the openings in the box sides. Furthermore, the integrated platform means various heights are possible. Length 85 cm, width 75 cm, height 95 cm.

- box top is covered in durable leather
- soft and safe rubber on short sides
- made of wood with metal-reinforced openings
- pyramidal base for greater stability
- integrated transport system using castors
- integrated platform for multiple uses

JUMPER

COMBIFRAME

Combiframes are available in various models. They are made of thin-walled metal tubing with rounded corners. This makes them lightweight, safe and easy to use. The combiframes can be stacked and used with other Just For kids equipment, giving a wide variety of exercise options. The matching tops are made of solid wood or durable material with absorbent filling and are available in two sizes. They can be secured to other combiframes using the self-clamping rubbers.

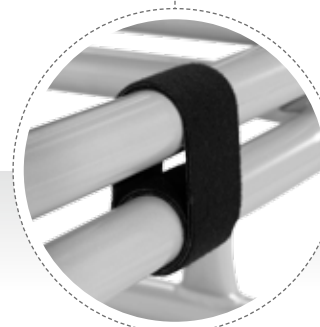

COMBIFRAME 4-IN-1

COMBIFRAME 4-IN-1

Item 1409294

Comprises two inwardly tapering steel frames, 1 wooden deck plank and 7 connectable mats that can be stored in the frame. The Combiframe can be combined with many other Just For kids products. It is made of thin-walled metal tubing with rounded corners. The Combiframe is lightweight and safe to use. Total height of Combiframe 85 cm, width between 57 cm and 90 cm.

MINI-GYMNASTICS

Item 1403458

Square, space-optimized base frame including Just For kids modules mini-uneven bars, mini-horizontal bar, mini-parallel bars and mini-rings. Total area approx. 4 x 4 m. Supplied without mats.

MINI-HORIZONTAL BAR 'JUST FOR KIDS'

Item 1403424

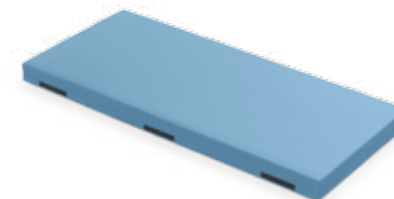

Includes 2 stable base frames 200 cm long, 2 uprights for base frames with special clamps, 2 height-adjustable tubing including wooden parallel bar 160 cm long. Height adjustable in steps from 160 – 180 cm.

MINI-PARALLEL BARS 'JUST FOR KIDS'

Item 1403434

Includes 2 stable base frames 200 cm long, 4 uprights for base frames with special clamps, 4 low adjustable tubing including parallel bars 160 cm long. Height adjustable in steps from 85 – 125 cm.

MAT FOR 'JUST FOR KIDS' EQUIPMENT

Item 1403464

With bisonyl and zipper, 300 x 135 x 18 cm, blue

MINI-UNEVEN BARS 'JUST FOR KIDS'

Item 1403454

Includes 2 stable base frames 200 cm long, 4 uprights for base frames with special clamps, 2 low and 2 high adjustable tubing including parallel bars 160 cm long. Height adjustable in steps from 85 – 125 cm and from 160 – 180 cm.

DOUBLE REBOUNDER 'JUST FOR KIDS'

Item 1403414

Double Rebounder; includes base frame with height-adjustable tubing with elastic cord, protective padding and bar. Ideal as a training aid for practicing the swing on the uneven bars or horizontal bar and for strengthening the abdominal and back muscles.

MINI-STILL RING FRAME 'JUST FOR KIDS'

Item 1403444

Includes 2 stable base frames 200 cm long, 2 uprights for base frames with special clamps, 2 extra high adjustable tubing including straps and rings. Height adjustable in steps from 195 – 220 cm.

TIPU

Item 1555920

6 colourful stools that can be used clamped into each other, creating lots of possibilities either individually or combined. They can be used to sit on, balancing, running around, as a demarcation or just for playing with. Sold as a set or separately, a stool is 40 cm high and weighs 3 kg.

GYMNASTIC BUCK

Item 1407024

For school sports to teach vaulting. The gymnastic buck is 60 cm long and is height adjustable 90–125 cm. The body is covered with real leather. Integrated castors make the gymnastic buck quick and easy to set up.

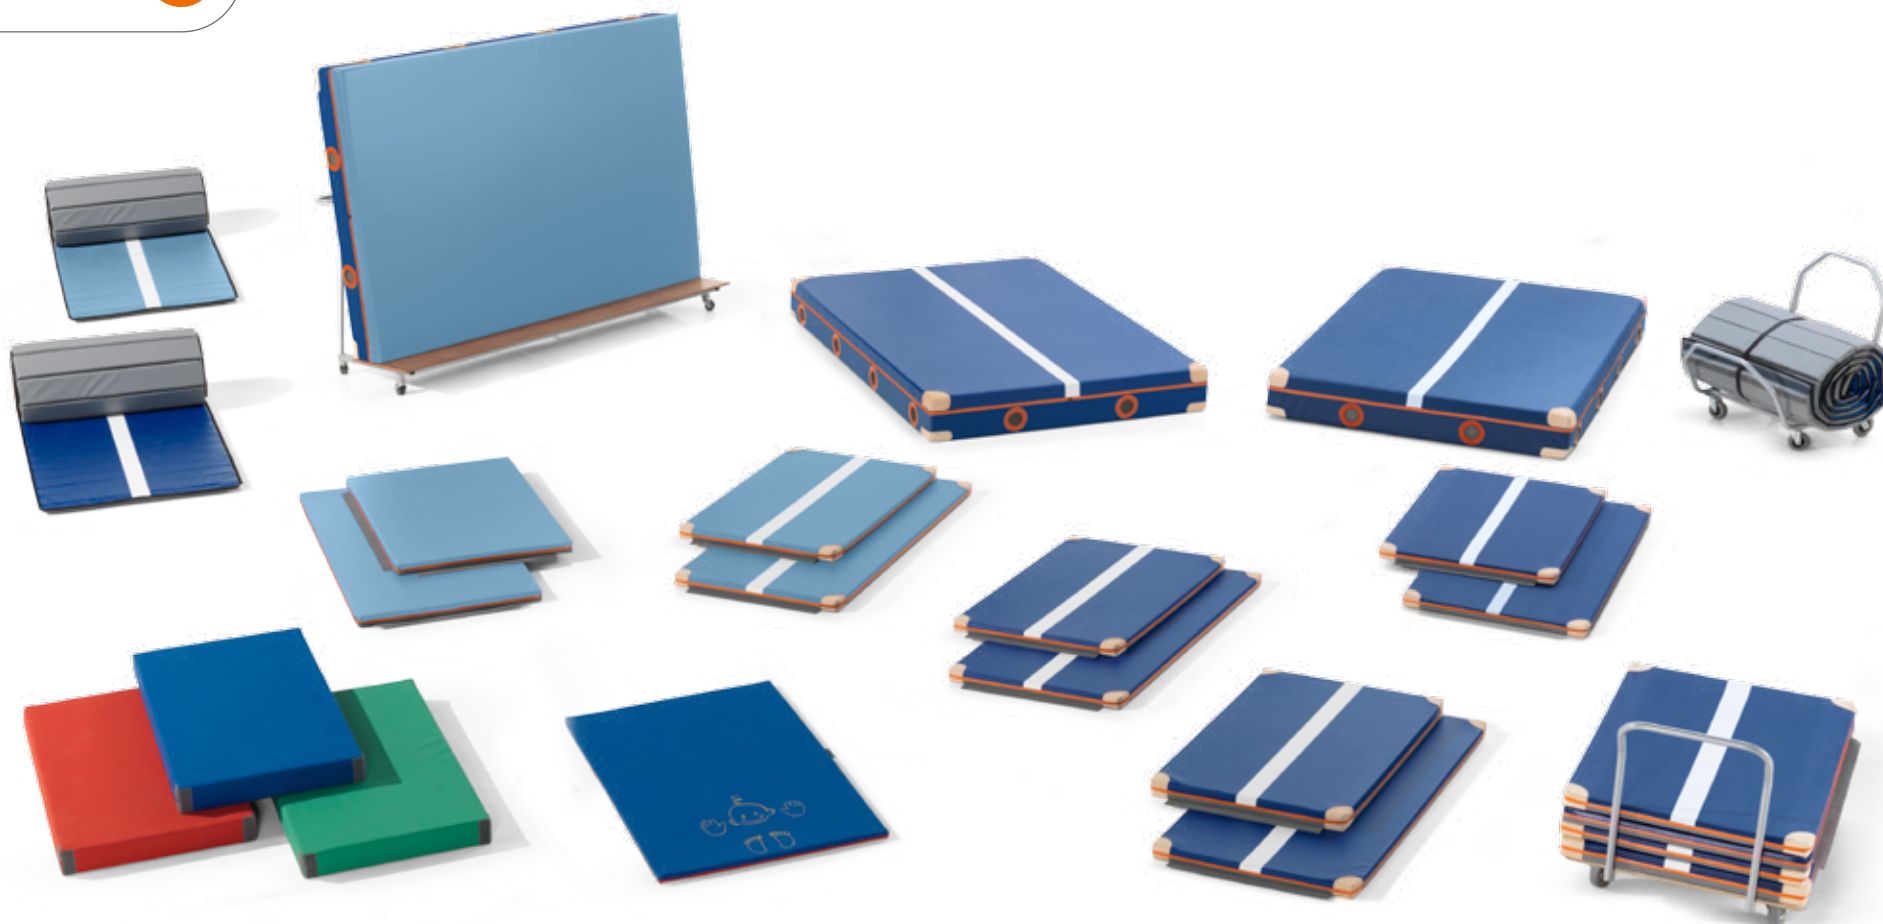

MINI VAULTING TABLE

Item 1407198

The „Mini Vaulting Table“ is a small version of the vaulting table known from artistic gymnastics. These smaller devices enable children to vault safely. They learn to vault without fear. The 85–125 cm height adjustment means the Mini Vaulting Table can be set to different ages and levels of difficulty.

MATS OVERVIEW

A wide range of mats are available that can be used in many different ways. From nursery children learning their first forward rolls, to safe landings from greater heights for older kids, the range offers a wide array of options. The mats ensure a safe environment for kids to learn their moves. The mats are lightweight and easy to stack.

- flame retardant
- washable, hygienic
- easy to transport with integrated handy grips
- 2-sided linking

See page 25 for technical details on the individual products, such as length, height and weight.

BOXES OVERVIEW

Boxes are an essential part of school sports equipment for learning different moves. Our products offer a variety of combinations in addition to the classical use as a vault box. This opens up all sorts of new exercise options. The boxes are suitable for both nursery age and school sports for older kids.

- metal-reinforced box elements
- highly stable due to adjustable lower section
- box tops of real leather (Multibox has artificial leather)
- integrated castors for easy transport

Further information about multiboxes can be found on page 8 and Jumper boxes on page 12. All other technical details are on page 29.

www.juvv.com
ID 1500000000

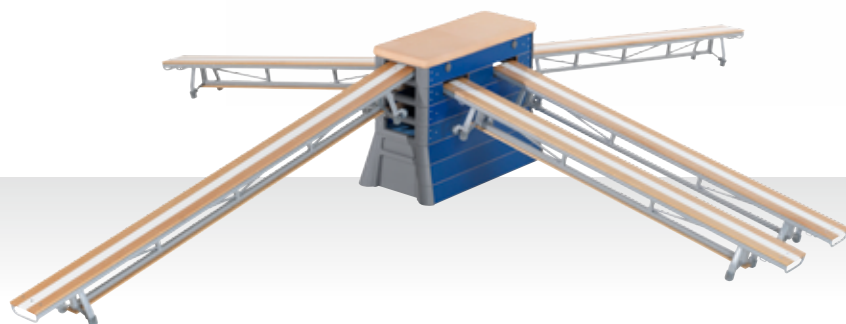

BENCHES OVERVIEW

The bench is suitable for sports training for all ages and is a must for every nursery or school. Our benches are distinguished primarily by their ease of use and high stability. The castors mean the benches can be set up quickly. Being made of not only wood but also metal, the benches are particularly stable and unlikely to tip over:

- castors for easy transport
- very stable because of metal reinforcement
- can be hooked in the vaulting box or the Jumper
- uses wood from FSC-certified suppliers

Further technical details can be found on page 29!

For rolling and jumping, easy to roll up, lightweight, connectable.

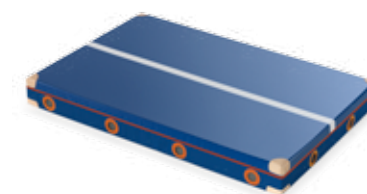

TUMBLING MAT, BISONYL
Item 1573011
600x120x4 cm
For rolling and jumping, easy to roll up, sandwich filling, connectable.

LANDING MAT BASIC
Item 1572000
300x200x30 cm
Soft filling 18 kg/m³, 4 leather corners, 12 handy grips.

LANDING MAT BISONYL
Art. 1572011
300x200x30 cm
PU filling 30 kg/m³, 8 leather corners, 12 handy grips.

LANDING MAT, BISONYL
Item 1572013
300x200x30 cm
Sandwich filling, 8 leather corners, 12 handy grips.

MINI-SPRINGBOARD
"JUNIOR"

Item 1411754

Original Reuther, for body weight of max. 40 kg.

SPRINGBOARD, PADDED

Item 1411764

120 X 60 cm

Original Reuther, for body weight of max. 80 kg.

MINI TRAMPOLINE

Item 1411811

Dimensions adapted to gym benches. Height adjustable front 30-39 cm, rear 39-53 cm.

Can also be used horizontally (39 cm).

MINI-GYMNASTICS

Item 1403458

Total surface area approx. 400x400 cm

Base frame with mini-parallel bars, mini-horizontal bar, mini-uneven bars and mini-ring mount. Supplied without mats.

COMBIFRAME 4-IN-1

Item 1409294

Complete with 7 mats and round deck plank, frame width 57-90 cm and height stacked about 85 cm.

TIPU

Item 1555920

40 cm

6 stable stools, easy to use, can be assembled into a bench. 18 kg (6x3 kg).

TRANSPORT TROLLEY

Item 1522084

For combiframes, etc.

CLIMBING ISLAND

Item 1555534

A games room or gym in 3 minutes. With integrated mats. Only 2 m² storage space required.

EXERCISE FRAME

Item 1490164

44x30x35 cm

Exercise frame usable on three sides. Height adjustable to 30, 35 and 40 cm.

COMBIFRAME, SHORT

Item 1409214

57x57x44 cm

Weight 6 kg.

COMBIFRAME, LONG

Item 1409204

130x57x44 cm

Weight 13 kg.

COMBIFRAME, PYRAMIDAL

Item 1409244

130x80/57x74 cm

Made of sturdy and thin-walled metal tubing (ø 35x1, 5 mm) that does not bend. Weight 18 kg.

VAULT DECK COMBIFRAME, SHORT

Item 1409260

63x63 cm

Wooden board with padding and artificial leather; with self-clamping rubbers for secure mounting to short combiframe and combiframe 4-in-1.

VAULT DECK COMBIFRAME, LONG

Item 1409280

136x63 cm

Wooden board with padding and artificial leather; with self-clamping rubbers for secure mounting to long and pyramide-shaped combiframe.

JUMPER

Item 1408254

79x72x45 cm

Multifunctional smaller boxes with pyramid-shaped base and integrated transport platform with castors, easy to roll. Mounting openings on two sides of the boxes and can be combined with connection bars. Very stable in accordance with NEN-EN 1176 and 916, made of wood with FSC label.

VAULTING BOXES WITH LATERAL OPENINGS IN MID-SECTION

Item 1408124

147x74x110 cm

Multifunctional boxes with pyramid-shaped base and integrated transport platform with castors, easy to roll. Mounting openings on all sides of the boxes and can be combined with connection bars. Very stable in accordance with NEN-EN 1176 and 916, made of wood with FSC label.
